Worm - Yellow

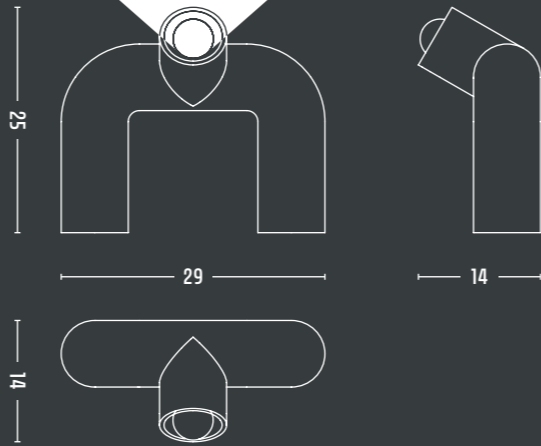

## ANIMAL LIGHTS

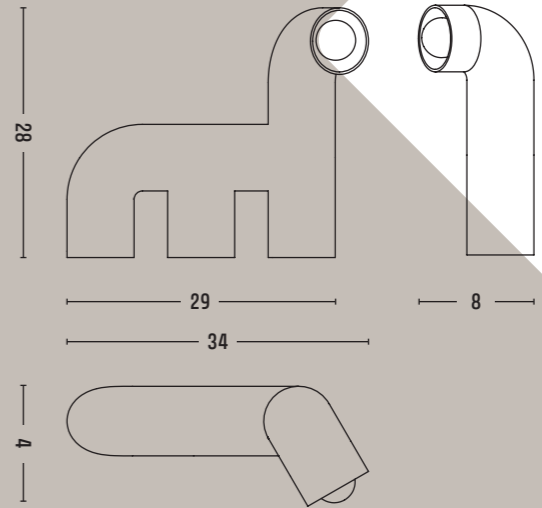

As children, we develop images and make-believe creatures in our own worlds. These, in turn, help us establish connections with others over time - giving us confidence through their presence. The Animal Lights series of lamps expresses this story through their forms. Consisting of the Dino, Monkey, and Worm lights, the connection to our own inner child exudes through their highly playful forms. The expression of light-heartedness and joy is supported by the atmospheric light, which provides warmth and calms the inner spirit. The playful, colorful structures produce a smile on viewers faces.
