CARTAPESTA I

How do you combine high quality and elegance with the allure of playfulness? Studio Bovti asked itself this question and answered it with the help of an unusual material composition. Cartapesta is the expression of the joy of experimenting and daring new combinations. Colorfulness and stone express these qualities, supported by the wild and bright texture of the cardboard mesh. One often has the impression that elegance must not be daring and must be very strict in its form and materiality. Our answer to this is that elegance must also have a certain cheekiness.
